

360°-Benchmarking for Pension Funds

- » Extensive comparisons of investments, benefits, sustainability, etc.
- » Broad database (more than 300 pension funds)
- » Evaluations tailored to your needs

How does your pension fund compare with others? The PPCmetrics 360° benchmarking allows comparing different characteristics of your institution (investment activities, benefits, actuarial practice, sustainability, etc.) with other Swiss pension funds. The benchmarking is based on the most recent annual financial statements of more than 300 pension funds with total assets of over CHF 600bn.

Over 30 key indicators

The 360° benchmarking for pension funds allows for a comparison of over 30 key indicators.

Different aspects

Among other indicators, it is possible to compare strategic asset allocation, costs (administration, asset management), conversion rate, actuarial interest rate, interest on retirement assets or questions of sustainability (ESG approaches, reporting, etc.).

Client-specific

The benchmarking is tailor-made based on the key indicators relevant to you.

Analysis and evaluation

Competent explanation on the interpretation of all relevant key figures.

Extensive Database

The analyses are based on audited financial statements of more than 300 Swiss pension funds with total assets of over CHF 600bn and 3.5m insured persons.

Know-how and experience

PPCmetrics is a leading consultant to Swiss pension funds with competent services for over 30 years.
